UNIVERSITY LIBRARY ULAMRAPs

Volume 1 | Number 1 | January-February 2018

ULAMRAPs

stands for University Library Annual and Monthly Reports of Accomplishments, Programs and Services, an **INNOVATION** that broadcasts what the UP Mindanao Library is doing that **IMPACTS** on the lives and requirements for instruction, research, and instruction of the University's students, faculty, administrative staff, and research/extension/professional staff (REPS). This publication is among the numerous information-delivery medias invented by the University Library which spun-off from the printed medium.

ULAMRAPs hopes to fulfill the University Library's Mission "as the single most potent instrument by which the University discharges its teaching and research functions in pursuit of truth, knowledge, and wisdom," and its Vision to be "the University's main depository of knowledge for minds that shape the nation."

We hope that our users and readers would feast on the ULAMRAPs for the latest, the tidbits, and the pithy news happening at the University Library.

VISITS & TOURS

The University Library is considered as one of the tourist destinations of alumni, neighboring agencies, universities, colleges and schools in the region. The 1st batch of 2018 visitors were the **Book Lovers Club** of the Basic Education Department of Holy Cross of Davao College on **January 08, 2018**. The group was composed of 62 primary schoolchildren and senior high schoolers, and their 2 coach teachers.

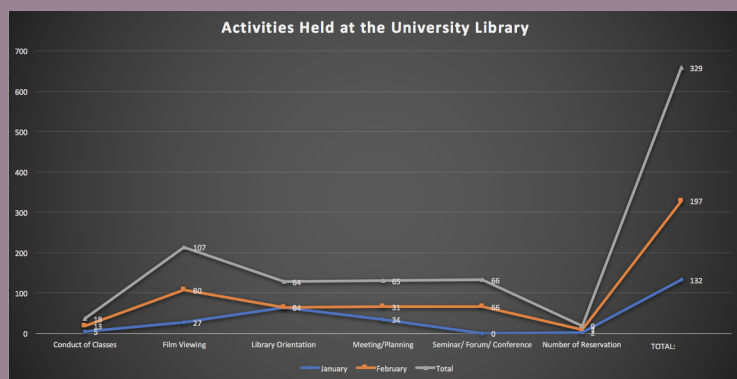

The Book Lovers Club of the Basic Education Department of Holy Cross of Davao College visited and toured the University Library on January 08, 2018.

Book donations were received on 12 January 2018 from: Dr. Frazen Tolentino-Zondervan, Dr. Jaye de la Cruz, Dr. Sietze Vellema and Dr. Rica Joy B. Flor of Wageningen University, the Netherlands, through Ms. Marilou O. Moniflor of the School of Management, U.P. Mindanao.

Two teachers of the Tuburan Institute, Inc.-Steiner/Waldorf School visited the University Library on Valentine's day.

The University Library is the only fully-equipped facility in the campus. It has almost everything you need for instruction, research and public service, except the lingering **internet connection**. Despite this predicament, the Library has the fully-furnished Computer and Internet Center with 21 iMac units.

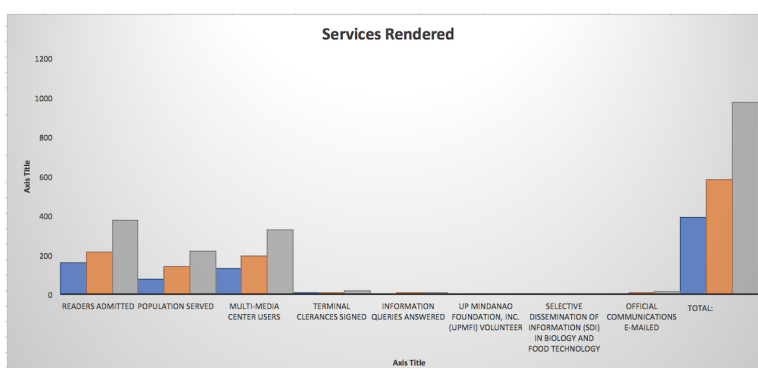

Another relevant and very useful part of the Library facility is the Multi-Media Center. It has the capability to capture and record everything that is going on in every event or activity. The chart above illustrates that the Multi-Media Center accommodates conduct of classes as there are faculty who believe that the Center is the most conducive place in the University for teaching and learning. A number of faculty chose the venue for their film viewing, theses presentations, and a whole lot more.

During educational visits and tours, the University Librarian entertains visitors with a library orientation detailing all that the Library can offer. Meetings, planning sessions, seminars, forums and conferences organized by both administrators and student organizations, are done conveniently when the weather condition is favorably cool. If not, the participants would go restless due to inadequate air-conditioning provisions. Reservations for use of the Multi-Media are done through telephone calls, emails, and personal scheduling at the Center.

The Philippine Council for Agriculture, Aquatic and Natural Resources Research and Development (PCAARRD) with UP Mindanao project leaders, had their Conference Meeting at the Multi-Media Center on **February 18, 2018**.

The All UP Academic Employees Union (AUPAEU) conducted its Strategic Planning and Forum with AUPAEU National President Carl Marc Ramota, at the Multi-Media Center on February 19, 2018.

The first 2 months of 2018 showed a minimum number of readers admitted, and population served at the Circulation counter because of the decrease in enrollment as there are only junior and senior students for the current academic year.

Among the service areas, the Multi-Media Center accommodated a good number of University constituents, alumni, and visitors. Terminal clearances of both faculty, and students taking their leaves-of-absence (LOA) were appropriately signed.

Library attendees and users who have inquired on different information requirements were either properly guided to the right resources, or provided direct responses.

A UPMFI 3rd year BACA student rendered 20 hours of service by producing an educational video about Library programs and services. The video is still in-process as of this publication.

A Selective Dissemination of Information (SDI) was provided to a BSBio student doing her thesis on "Transpiration in Eggplants," while a FoodTech student had her resource materials on "Anti-Cancer Properties of Seaweeds."

Emails sent and social media are the latest fronts utilized by the University Library to constantly update everyone on what to expect from its information provider and knowledge
